Redistricting
34-307. PRECINCT BOUNDARIES MAINTAINED

From January 15 in any year ending in 8 through September 15 in any year ending in 1, the board of county commissioners shall make no changes in precinct boundaries, except that a single precinct may be divided into two (2) or more new precincts wholly contained within the original precinct.

*Census Tracts

are small, relatively permanent statistical subdivisions of a county or equivalent entity that are updated by local participants prior to each decennial census as part of the Census Bureau's Participant Statistical Areas Program. The Census Bureau delineates census tracts in situations where no local participant existed or where state, local, or tribal governments declined to participate. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of statistical data.

Census tract boundaries generally follow visible and identifiable features. They may follow nonvisible legal boundaries, such as minor civil division (MCD) or incorporated place boundaries in some states and situations, to allow for census-tract-to-governmental-unit relationships where the governmental boundaries tend to remain unchanged between censuses.
