2

## Idaho Supreme Court Three-Year Architecture Initiatives Explained

3

## Cloud Pivot

4

## What is the Cloud?

- The cloud is a remote data center that provides servers, software, and information that run on those servers. Cloud servers are in data centers all over the world.
- Users and companies do not have to manage physical servers themselves or run software applications on their own machines. They can access these through an internet connection.

5

## Why Move to the Cloud?

- Reduce complexity
- Stabilize and predict costs
- Improve security
- Enhance stability & availability
- Improve performance
- Reduce risk of data loss
- Enhance business continuity & disaster recovery
- Enable scalability (scale up & down)

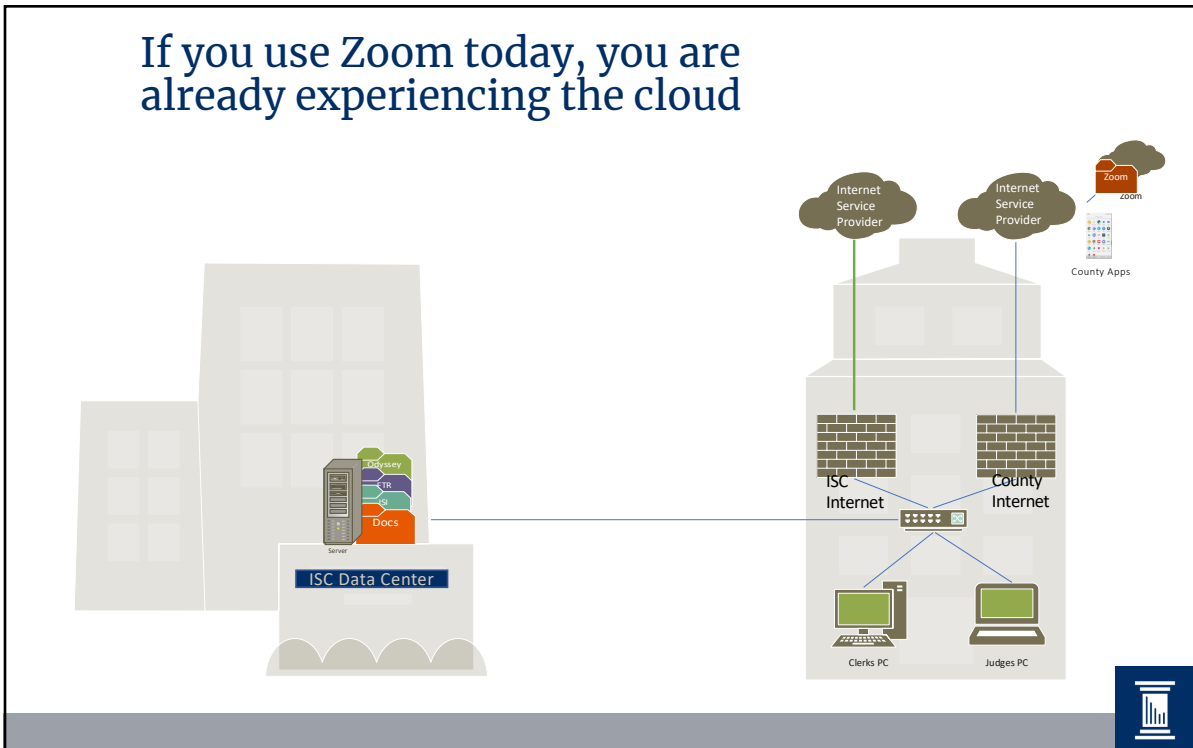

6

## What does it look like today?

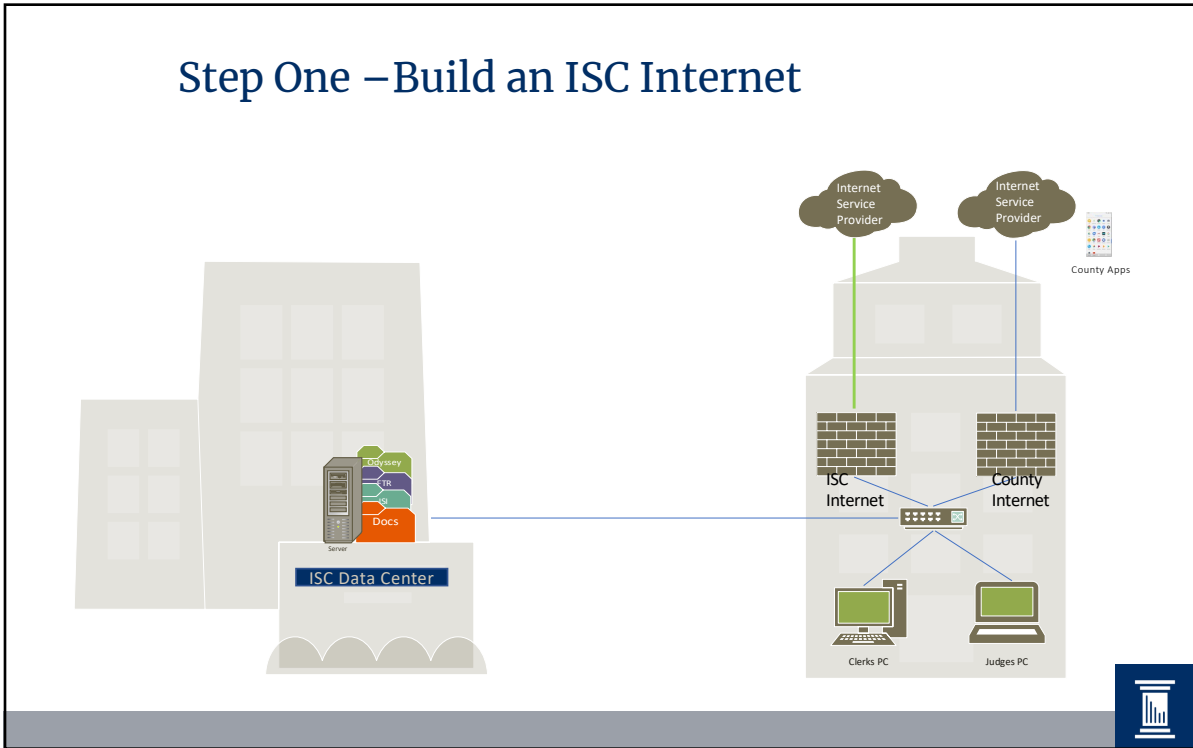

7

## If you use Zoom today, you are already experiencing the cloud

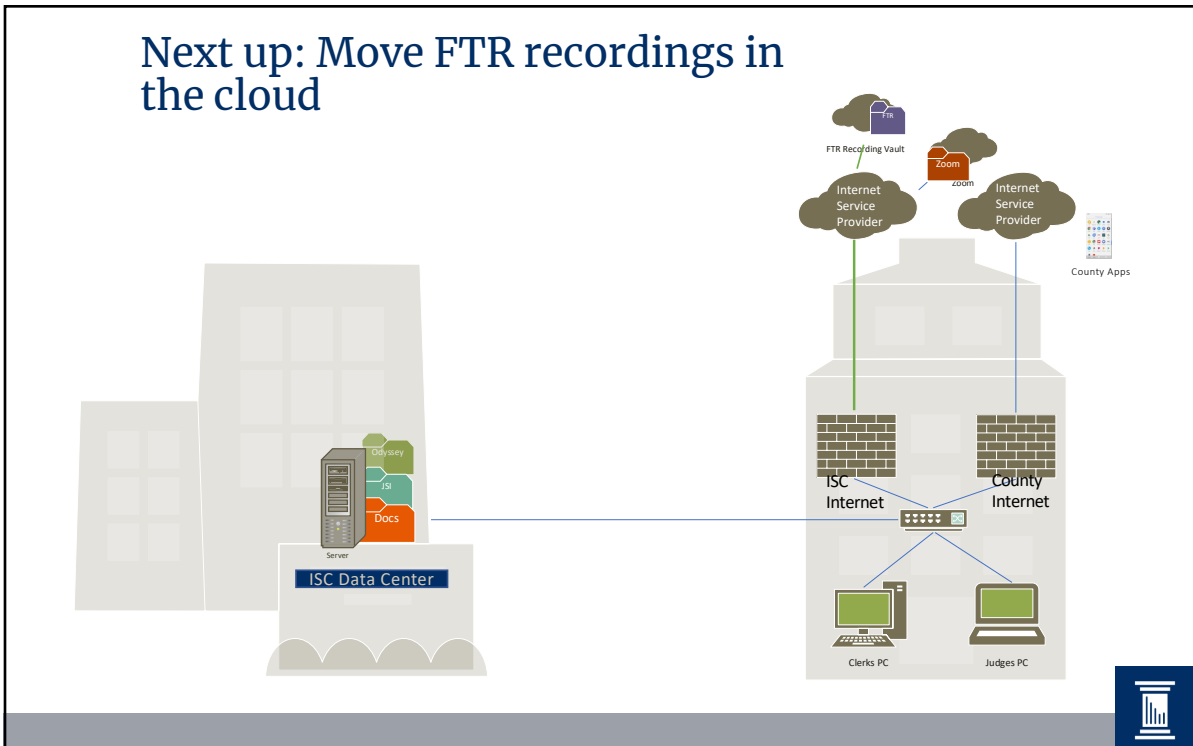

8

## Step One – Build an ISC Internet

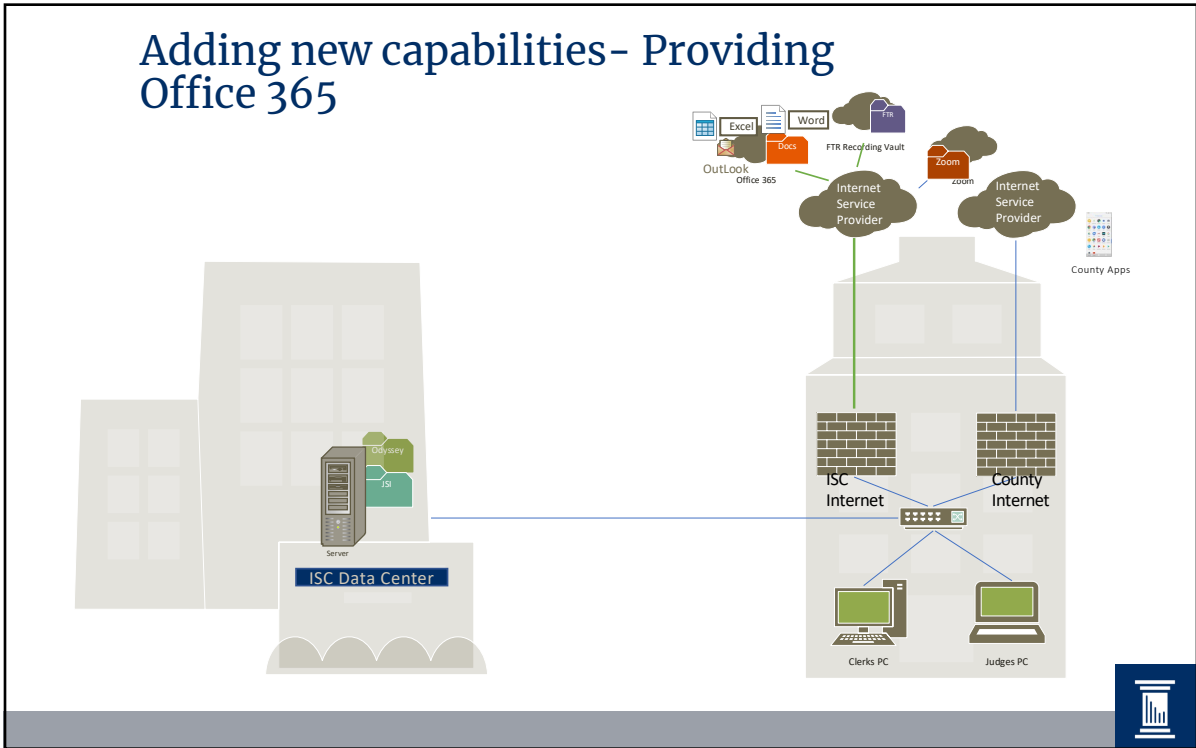

9

## Next up: Move FTR recordings in the cloud

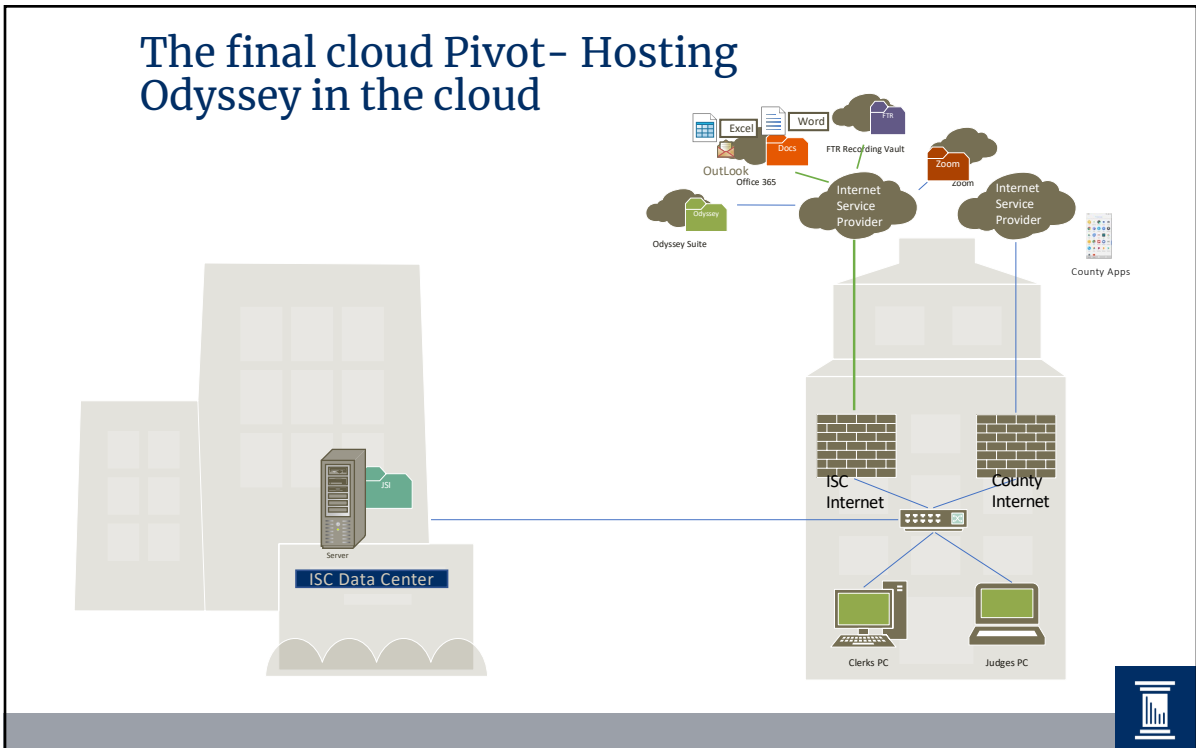

10

## Adding new capabilities- Providing Office 365

11

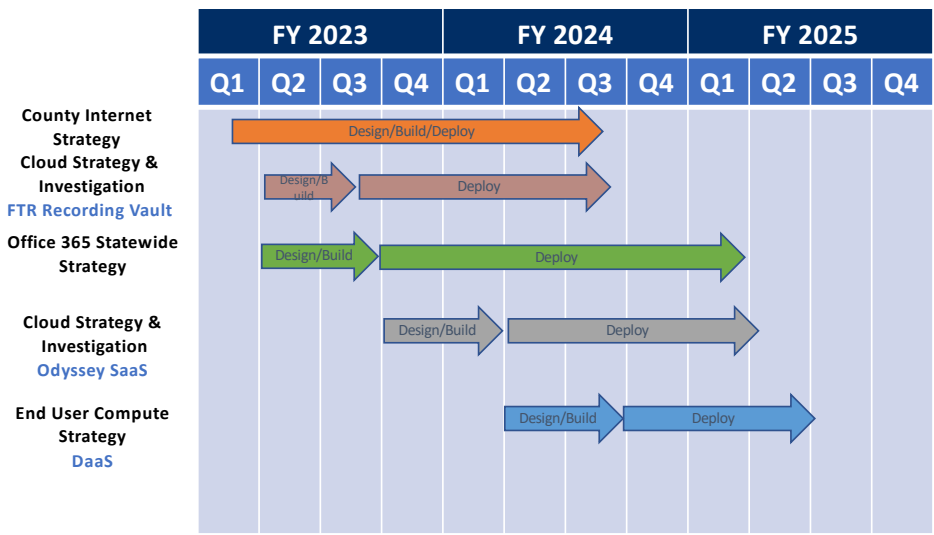

## The final cloud Pivot- Hosting Odyssey in the cloud

12

# IT Architecture Initiatives

## Technology Deployments for the Idaho Judiciary

Three-year plan assumes available funding
